Turritopsis Dohrnii
The Immortal Jellyfish

when injured or ageing,
secretes a chemical
message of rejuvenation

It drops to the bottom
of the ocean, becomes
a polyp and returns to
an earlier, healthier
version of itself

This intense
regenerative
phenomenon
has
fascinated
scientists for
years

Until
groundbreaking
research was
able to replicate
the regenerative
message making
it suitable for
humans

Turritopsin™
The Life Molecule

was isolated in a
laboratory after years
of research and testing

The result is bio
available
rejuvenation
inspired by the
immortal jellyfish

Turritopsin™

regenerative bio-technology

What to Expect

One of the incredible attributes of Turrیتopsin™ is that it works from the very first application with cumulative effects as time goes by. The results below were reported by participants in a clinical trial. Full trial results available on www.immortalskin.co.za

Smoother, softer plumper skin, reduction of fine lines and wrinkles. Reduction of inflamed skin and relief and healing from shaving rash.

Better hydration, better skin texture and removal of rough patches and skin tags.

Improved mood and zest for life, more energy and inclination to exercise.

Healing of sun damage, pigmentation and discolouration, more even skin tone.

Noticeable feeling of radiance and self-confidence, a feeling of vitality and improved posture and presence.

Reduced redness, removal of acne (phenomenal results on adolescent acne).

Regulation of dry and oily skin zones with a more even complexion.

Who is Turrیتopsin for?

Turrیتopsin™ is suitable for daily use in male and females, for all ages, for yogis, sportspeople, for the elderly, for teenagers, for pets and for scrapes and cuts in children. It is used for vitality, improved skin, cellular regeneration, longevity and life force. It is safe for pregnant women, for those with disease conditions and post illness recovery.

Testimonials

My skin is glowing from the Turritopsin™ and my hair looks thicker and healthier. I'd like to think I'm starting to look beautiful again, even at 46. *Catherine Geils*

An incredible fact is that Turritopsin™ improved the ageing of my skin and made the skin very smooth. My hair and nails grow much faster and I also lose less hair. In addition my rather depressed state of mind disappeared almost overnight. I found zest for life again, even at 60. *Alexandra Christokat*

"I continue to be amazed and delighted by the process of regeneration with Turritopsin™. I am blown away by the gum repair I'm seeing from taking it over the past 4 months. *Diana Rose*

What I really noticed from taking Turritopsin™ is my increased receptivity. I experienced it going deeper than ever before into my physical body. At this point my experience of Turritopsin™ is a deep physical soothing and relaxation on the inside. *Suzanne Tremolada*

I had an incident with a ladder - the top step gave in as I was climbing down... My shin (knee to ankle) was very badly banged up - 4 huge bumps started forming immediately and it should have been black and blue! Then I sprayed Turritopsin™ on it and that very same evening, there wasn't a single bump and no pain at all. There is also no sign of a bruise, anywhere. *Lani Pieters*

Methods of Application

Put your skin cream or serum in your palm. Add 1 spray & apply

Spray directly in mouth or spray on scalp

Spray or spritz face before moisturising

Add it to your balm & apply to eyelashes and brows

Spray directly onto scrapes & cuts

USEAGE: 1 to 2 sprays once or twice a day.

To activate, hit bottle twice on palm of hand before use.

LIFESPAN: 1 X 30ml bottle lasts up to 3 months

PRECAUTIONS: Keep away from direct sunlight

INGREDIENTS: Distilled water, Turritopsin™

Meet the Founder

Before making this transformative discovery, homeopathic Doctor, Adam Suzman, was actively involved in Turritopsin™ research for five years. Inspired by the work of Professor Shin Kubota from Kyoto University, (an authority on the Immortal Jellyfish *Turritopsis Dohrnii*) Dr. Suzman was convinced the regenerative technology of the jellyfish could be replicated.

“All along I was absolutely hopeful we could use the regenerative technology from the Immortal Jellyfish for humans, and when we started getting revolutionary results it was extremely exciting.”

After countless test subjects, formulations and years of research Turritopsin™ was identified and proven to mimic the effect of the Immortal Jellyfish. Turritopsin™ is able to regenerate the body from the cellular level. This is an incredible boon for the regenerative and longevity industry and is set to be a world renowned technology for long life.

“It's ironic that the key to longevity and vibrancy was found in the ocean in such a tiny creature.”

We are proud and delighted to present Turritopsin™ and look forward to spreading this groundbreaking technology - the life molecule - to all those who need it. Dr Suzman lives in Cape Town, South Africa where he conducts ongoing research and clinical trials into the different applications of the life molecule, Turritopsin™ .

Ethical | Transparent | Sustainable

100% natural & organic, no parabens, phthalates, petrochemicals, fragrances or sodium lauryl sulfates Sustainable, scientific, clinically proven

Not harmful to any of the body systems or organs, totally regenerative on all levels
